

KEERTHIK VARMAN S

Python Developer | AI & Machine Learning Engineer (Fresher)

+91 81444 77778 | keerthikvarman06@gmail.com | Bengaluru / Vellore, India | [LinkedIn Profile](#)

PROFESSIONAL SUMMARY

M.Sc. Artificial Intelligence and Machine Learning student with hands-on experience building Python, Machine Learning, and Computer Vision projects including CNN-based image classification, YOLO26n object detection, and OpenCV face recognition systems. Skilled in TensorFlow, Keras, PyTorch, Scikit-learn, NumPy, and full-stack web development with Django and REST-style applications. Strong foundation in Data Structures and Algorithms, SQL/DBMS, and model evaluation. Seeking a Python Developer / AI-ML Internship to apply machine learning and software engineering skills to build scalable, data-driven solutions.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML, CSS, JavaScript

AI / Machine Learning: TensorFlow, Keras, PyTorch, Scikit-learn, OpenCV, YOLO26n, CNN, Deep Learning, Computer Vision, NumPy, Pandas, Data Preprocessing, Feature Selection, Model Evaluation

Web Development: Django, Bootstrap, REST APIs, Responsive Web Design

Databases: SQL, SQLite, DBMS

Tools & Platforms: Google Colab, VS Code, Roboflow, Git, Telegram Bot API, MS Office

Core Competencies: Data Structures & Algorithms, Problem Solving, Team Collaboration, Self-Driven Learning, Public Speaking

EDUCATION

Vellore Institute of Technology (VIT), Vellore, India

Jun 2025 – Present

Master of Science in Artificial Intelligence and Machine Learning; GPA: 7.81

PSG College of Arts and Science, Coimbatore, India

Jun 2022 – May 2025

Bachelor of Science in Computer Science; GPA: 7.01

Kendriya Vidyalaya Matric Higher Secondary School, Dharmapuri, India

Jun 2020 – Mar 2022

Higher Secondary Education; 77.8%

PROJECTS

Handwritten Digit Recognition System (CNN Model)

Mar 2026 – Present

Vellore Institute of Technology, Vellore, India

- Developed a CNN-based deep learning model in Python (TensorFlow/Keras) to classify handwritten digits (0–9) from the MNIST dataset.
- Implemented image preprocessing, convolutional feature extraction, pooling layers, and Softmax classification using OpenCV and NumPy.
- Achieved 99% test accuracy with reliable real-time digit prediction on Google Colab.

Automated Stock Monitoring System Using Image Recognition

Jan 2026 – Mar 2026

Vellore Institute of Technology, Vellore, India

- Built a real-time computer vision system using YOLO26n, Roboflow, Python, OpenCV, and PyTorch to detect and monitor product stock levels via CCTV feeds.
- Integrated automated low-stock and out-of-stock alerts through the Telegram Bot API for real-time notifications.
- Improved inventory accuracy and reduced manual stock-checking effort, enabling faster restocking decisions.

Face Recognition System Using OpenCV

Aug 2025 – Dec 2025

Vellore Institute of Technology, Vellore, India

- Engineered a real-time face detection and recognition pipeline in Python using OpenCV and NumPy for live video streams.
- Implemented bounding-box processing and automatic storage of unrecognized faces for continuous model retraining.

Cervical Cancer Prediction Using Machine Learning

Jan 2024 – Sep 2024

PSG College of Arts and Science, Coimbatore, India

- Built and optimized classification models (Decision Tree, Random Forest, Gradient Boosting, Multiple Linear Regression) in Scikit-learn to predict cervical cancer risk.

- Performed data preprocessing, feature selection, and model evaluation, achieving 88% prediction accuracy.

Web-Based Sales and Customer Service Management System

May 2023 – Jul 2023

PSG College of Arts and Science, Coimbatore, India

- Designed and developed a full-stack web application using Django, Python, Bootstrap, and DBMS to manage product sales and customer service requests.
- Built a responsive UI with an integrated contact form and searchable product catalog, improving customer interaction efficiency.

KEY ACHIEVEMENTS

- Achieved 99% accuracy on the MNIST handwritten digit recognition benchmark with a custom CNN model.
- Delivered 88% prediction accuracy across multiple machine learning models for cervical cancer risk prediction.
- Active contributor to academic and technical events on software development and emerging technologies.
- Co-organized self-improvement workshops focused on leadership and team-building skills.

CERTIFICATIONS & TRAINING

- Full Stack Web Development in Python — 6-month course (in progress)
- Machine Learning from Basic to Advanced — Udemy

ADDITIONAL EXPERIENCE

- Implant Training — Uniq Technologies, Coimbatore
- Industrial Visit — JVS Electronics Private Limited, Bangalore
- Proficient in MS Office (Word, Excel, PowerPoint) through academic project work and presentations.
